

ADD IT UP

This game involves simple addition – but you have to figure out which numbers to add up.

1. Add the number of dimes in a dollar to the age when a child becomes a teenager.	5. Add the number of the month that Valentine’s Day is in to the number of the month that Labor Day is in.
2. Add the number of innings in a standard baseball game to the number of sides in a triangle.	6. Add the number of hours in a day to the number of points scored in a grand slam home run.
3. Add the year that John F. Kennedy was assassinated to the number of years in two decades.	7. Add the street address of the White House to the number of goals in a “hat trick” in hockey.
4. Add the traditional “unlucky” number to the traditional “luck” number.	8. Add the Spanish numbers <i>cinco</i> plus <i>cinco</i> plus <i>ocho</i> and give the answer in English.
